NEW LEATHER SOFAS

There is nothing comparable to the look and and feel of a well made leather sofa.

Leather is strong, durable and can withstand the daily rigors of daily life including children and pets.

With proper care, a quality leather sofa can last decades. Not only is leather hardy, it can be an aesthetic addition to any home decor.

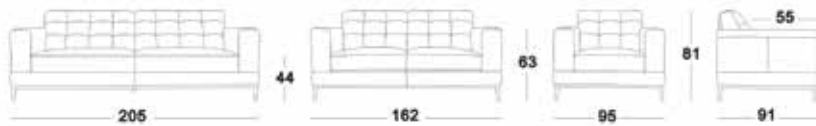

We have now introduced a new range of leather furniture that is truely unique.

TIPS WHEN BUYING LEATHER FURNITURE

- Always ask if the leather is finished or unfinished. Leather is graded according to the way it is finished for the market. Adding finishes and pigments to leather protect it from the sun and stains. Mimosa Furniture always stocks finished leather.
- Always ask if the leather is top-grain? If it isn't, it won't have the durability you think you're getting. Top grain leather is leather taken from the outer surface of the hide.
- Always ask if it is all leather or is some of it vinyl? Don't be duped.
- For tips on leather washing and maitainance Contact Us today.
